

# C1414RX

# 1.4 RM

## PRODUCT INFORMATION

C1414RX is a great defensive product with superior agronomics and disease protection. Attractive at harvest producing top end yields across the entire Group I maturity zone.

- High yields, attractive medium bush plants, great agronomics and defense.
- Rps3a and Rps1k for top resistance to Phytophthora Root Rot; BSR and SCN resistant as well.
- Good tolerance for Iron Deficiency Chlorosis and White Mold.
- Broad adaptation from the Dakotas to Michigan with high stress tolerance.

## MANAGEMENT TIPS

Excellent adaptability into no-till and minimum tillage and well adapted to all row spacings. Widely adapted from the Dakotas to Michigan. Handles stress and non-stress environments equally as well.

## PLANT CHARACTERISTICS

	1	2	3	4	5	6	7	8	9
Emergence	█	█	█	█	█	█	█	█	█
Standability	█	█	█	█	█	█	█	█	█
Shatter Resistance	█	█	█	█	█	█	█	█	█
Plant Height .....									M
Plant Type .....									MB
Pubescence .....									Lt. Tawny
Flower Color .....									Purple
Hilum .....									Black
Pod Color .....									Tan

## MANAGEMENT PRACTICES

	1	2	3	4	5	6	7	8	9
Poorly Drained Soils	█	█	█	█	█	█	█	█	█
Marginal Soils	█	█	█	█	█	█	█	█	█
Productive Soils	█	█	█	█	█	█	█	█	█
Adapt to No-Till	█	█	█	█	█	█	█	█	█
Early Vigor	█	█	█	█	█	█	█	█	█

## DISEASE RATINGS

Cyst Nematode Resistance ..... R3, MR14  
 Phytophthora Race Resistance ..... Rps3a/1k

	1	2	3	4	5	6	7	8	9
Phytophthora Tolerance	█	█	█	█	█	█	█	█	█
Brown Stem Rot	█	█	█	█	█	█	█	█	█
Iron Deficiency Chlorosis	█	█	█	█	█	█	█	█	█
Sclerotinia White Mold	█	█	█	█	█	█	█	█	█
Sudden Death	█	█	█	█	█	█	█	█	█
Frogeye Leaf Spot	█	█	█	█	█	█	█	█	█
Charcoal Rot	█	█	█	█	█	█	█	█	█
Stem Canker	█	█	█	█	█	█	█	█	█

GDUs are estimates based on observations and are to provide guidelines for area adaptation. Performance may vary from location to location and from year to year, as local growing, soil and weather conditions may vary. Growers should evaluate data from multiple locations and years whenever possible and should consider the impacts of these conditions on the grower's fields. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
