

VT Double Pro® RIB Complete® Corn

## PRODUCT INFORMATION

LG5465 has strong agronomics with exceedingly high yield potential. Moderately girthy ears produce high test weight grain from medium height plants that stand well and have average staygreen.

- Strong agronomics, exceedingly high yield potential; medium height plants stand well for harvest.
- Moderately girthy semi-flex ears, high test weight grain, complete husk cover flares open to aid drydown.
- Superior tolerance for NCLB & stalk Anthracnose, average ratings for Gray Leaf Spot and Goss's Wilt.
- Adapts well south of its normal maturity zone, fungicides are recommended when planted corn-on-corn.

## MANAGEMENT TIPS

Excels at medium to med-high populations. Performs at a high level across all soils, east to west. Has very good southern movement. Fungicides are recommended when planted corn-on-corn.

GDU's are estimates based on observations and are to provide guidelines for area adaptation. Scores and characteristics are assigned by LG Seeds based on comparisons with similar maturity LG and competitive products through internal field testing. Preferred Placement Zones represent the best areas of adaptation for a product based on in-field observations, genetic background, and trial data. Products may fit within only a portion of a zone, and products may perform well in other areas not identified. Contact your sales team for details.
